Link to this page: Here's what the HBR article wrote: The (data experts' sudden appearance on the business scene) reflects the fact that companies are now wrestling with information that comes in the varieties and volumes they've never encountered before. Finally, the HBR study suggests that culture is implicit, meaning that people within the body will be effectively hardwired to recognize and respond to it instinctively. You don't have to think about it; It just happens. Written by negotiating expert Jeff Weiss, the HBR Guide to Negotiating provides a disciplined approach to finding solutions that work for all involved. Popular Everyone agrees that managing change is difficult, but few can agree on how to do it. Most experts are obsessed with soft issues such as culture and motivation... Save Share Buy copies of October 01, 2005 providers must lead the way in getting value for the overall target Save Share The October 2013 Issue Executives at NHS Nightingale and Boston Hope would shed light on what worked for them.
